General Specifications

- Material** : Harness body, gland and wedges are Ductile Iron per ASTM A536, Grade 65-45-12
Clamping bolts and nuts are zinc plated carbon steel, ASTM 307
- Pressure** : Pressure rating equal to that of the DI pipe rating, with a minimum 2:1 safety factor. The grip of the wedges increase as the hydrostatic pressure increases
- Dimensions** : EZD - EZ Grip® Restraint and the Split Ring comply with all applicable dimensions of ANSI/AWWA C111/A21.11
- Installations** : Install in accordance with SIP installation procedures and intent of AWWA C600 / M41.
Pipe ends must be free from defects to allow wedges to properly engage the pipe ends.
Wedge pockets must be free from debris intrusion to allow movement, polyethylene wrap of the restraint is recommended as a prevention.
May be used on Steel Pipe up to 12". For higher sizes please contact SIP Industries.
* **Not for use on Spigot End of M.J. x P.E. Fittings or on P.E. x P.E. Fittings.**
* **Wedges are heat treated, 370 to 470 BHN hardness range**
* **If pipe hardness is over 230 BHN, do not install and contact SIP for further assistance**
Note: There are no additional tools required for installation other than the tools required to install standard sizes of hex nuts from 5/8"-1 3/8". The hex heads and rods shall be designed to tighten clockwise.
- Deflection** : Restraint allows the full joint deflection dictated by pipe manufacturer's recommendation, and maintains the seal while under pressure, and while subjected to ground movements
