General Specifications

- Material** : Harness bodies are Ductile Iron per ASTM A536, Grade 65-45-12
Clamping bolts and nuts are zinc plated carbon steel, ASTM 307
- Pressure** : The grip of the 360° circumferential serrations increases as the hydrostatic pressure increases.
- Dimensions** : Restraint compatible with Ductile iron pipe manufactured in accordance with ANSI/AWWA C150 & C151 /A21.50 & A21.51.
Harness is compatible with all bell and spigot (push-on) joint socket DI pipe
- Installations** : Install in accordance with SIP installation procedures and intent of AWWA C600 / M41
Pipe ends must be free from defects to allow proper gland engagement to the pipe ends
Note: There are no additional tools required for installation other than the tools required to install standard sizes of hex nuts from 5/8"-1 1/4". The hex head bolts and rods shall be designed to tighten clockwise. The hex head bolts and rods are manufactured to allow for disassembly and re-installation of the restraint.
- Deflection** : Restraint allows the full joint deflection dictated by pipe manufacturer's recommendation, and maintains the seal while under pressure, and while subjected to ground movements
